AIR SCOTLAND VIRTUAL – NOTAM FOPS01102025

**Dear members,**

As of 2230 on 30/09/2025, our winter programme went live successfully. We want to take this opportunity to thank all our members for their patience and understanding during this time. We recognise that we overran with our estimated launch time and apologise once again for any confusion this may have caused.

Any members that were flying during the transition should be rest assured all active flights and subsequent PIREPS have been successfully received and processed.

We are excited to share our programme which features many more winter European hops, plus flights to Hurghada and Sharm El Sheik in Egypt, Newark in the USA, Cancun in Mexico, Toronto in Canada and even Cape Verde in Africa.

We have listened to your request to operate long-haul aircraft on shorter routes, and you will notice that we have adjusted the operating fleet to accommodate this to an extent while maintaining as much realism as possible. For example, the A350 will now operate Edinburgh – Zurich. Pilots will then be able to book one of the below:

- A – Return to Edinburgh or,
- B – Continue to Dubai which will then require them to route back to Edinburgh via Zurich offering a long haul destination, split between two sectors.

We will be adding our additional African (Cape Verde) and Egyptian (Hurghada and Sharm El Sheik), routes tomorrow between 1600-2000L.

As per the previous NOTAM, we request all members to share feedback regarding this winter programme as it will allow us to evolve and shape our future route updates.

As always – thank you all for your continued support!

Kind regards

Connor Sullivan  
Founder
